Central Lincoln PUD again expresses its support for the Summer Spill program proposal. We believe the original proposal had advantages over what is now presented, but this revised version is better than nothing and it needs to be tried even for the one year. Hopefully it will be extended beyond the first year to provide an truly adequate trial period. We believe that never allowing a change in policy direction from past mitigation operations in the Basin is a mistake. This proposal is a small and conservative shift in current river operations and the opportunity to observe results and to learn should be welcomed by all parties.
